

WHY NETACCESS IP ACCESS SOLUTIONS TOP TEN REASONS

- ★ Save time and money. Everything at the door wires right into Edge for quick installation and control.*
- ★ Edge runs from a single switch into the nearest IT closet.*
- ★ Single CAT-5/6 wire is all that's needed, no home run cables - you just run to each door from the nearest IT closet.*
- ★ Edge can be PoE powered right out of the box, eliminating power supplies; processors, wire wraps and conduit.*
- ★ Edge accomodates todays advanced functions such as read/write LCD display, supervision and shared access activity with other network systems.*
- ★ Scalability built in. Edge can easily adapt for facility expansion- whether it's controlling two doors with a few hundred card holders or managing hundreds of doors at multiple facilities with 40,000 card holders.*
- ★ Exceptional flexibility. Comprehensive line of reader/controller configurations and supports iCLASS, Prox, FlexSmart, FlexPass, MIFARE/DESFire, Crescendo or Wiegand output readers.*
- ★ Two software versions available. Standard Edition for small to medium access deployment and Professional Edition for medium to large access control requirements.*
- ★ Comprehensive software feature sets in both versions; badging utility, time and attendance, automats, multi site management, multi server capability.*
- ★ Use Netaccess IP access solutions to generate recurring revenues with remote access management.*
